

The **aero KPR Face Protector** is designed specifically for WicketKeepers who wish to perform at their very best

Keepers are increasingly trying to put extra pressure on batsmen by standing up to the wickets for the quicker bowlers. They're now expected to take extra risks for their team.

Keeping in a batting helmet was the only option available until now. But a batter's helmet is heavy and hot with the back of the head completely enclosed with unnecessary protection. The vision and protective needs of a batsman are vastly different to those of a keeper.

The **aero KPR Face Protector** provides a far superior option...

- Naturally ventilated
- Very light weight
- Fits snugly
- Easy to put on and take off
- Allows extremely wide vision

The **aero KPR Face Protector** gives keepers of all ages and skill levels the **confidence to perform at their very best.**

BETTER BALL CONTROL

- Wide, unhindered front and peripheral vision

FREE CARE BAG

BETTER DURABILITY

- Tough, steel wire construction
 - P1** titanium
 - P2** **P3** carbon steel
- Iodised and plastic coated to prevent oxidation and abrasion
- Includes care bag
- **One year warranty**

BETTER PROTECTION

- Curved frontal design deflects ball on impact
- Multiple layers of 3D moulded foam helps absorb impact
- Extra chin and throat protection for all possible ball deflections
- Tested and complies with AS/NZS4499.3

BETTER COMFORT

- Top and back of the head are naturally ventilated
- 60% lighter than a batter's helmet
- Easy to put on and take off
- Adjustable elastic straps ensures a snug fit
- Can be worn with your cap and glasses
