

**aero Batsman Hand Protectors (BHPs)** are designed to naturally support and assist your hand and forearm muscle function while batting. The patented airflow feature helps keep your hands cool and the 3D moulded foam gives you the confidence that your hands have the very best protection on the market.

**aero BHPs** are moulded to get your hands ready to grip the bat with virtually no assistance from the forearm muscles ...reducing muscle fatigue over extended innings.

Multilayered hi-impact foams are 3D moulded to create unsurpassed levels of hand protection, as well as significantly reducing weight and profile,

Your hands sweat excessively when you bat. **aero's** patented air flow design allows the air to breeze across the back of your hands creating an amazing cooling effect.

High performance **Amara**/silicon leather palms create unparalleled grip in sweaty conditions.

**aero BHPs** come with a **BatGrip** that's designed specifically to work with the hand protectors to provide that astonishing grip...along with two **wrist sweatbands**.

**aero BHPs** are warranted for 12 months **ONLY when used in conjunction with the aero BatGrip**

**aero Batsman Hand Protectors** will not only give you a significant performance advantage over old style gloves, you'll soon forget you're wearing any hand protection at all!

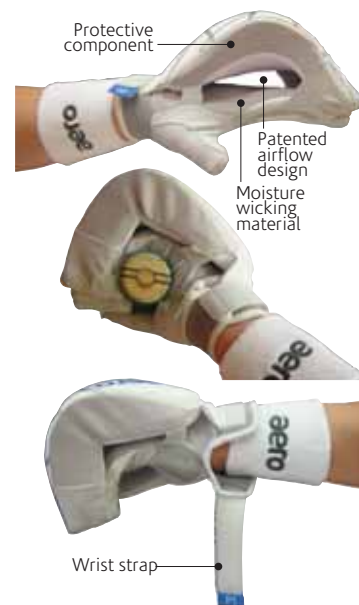

## BETTER PROTECTION

- Multi-layered hi-performance foam protection spreads impact more efficiently over the hands and up your arms which stops fingers from being crushed against the bat handle
- P1** features extra hi-density foam layers
- P1** for ball speeds up to 160km/h  
3 LAYERS
- P2** for ball speeds up to 130km/h  
2 LAYERS
- P3** for ball speeds up to 110km/h  
2 LAYERS

## BETTER COMFORT

- Snug fit palm by using finely woven **Amara** synthetic leather
- Superior friction provides extra grip on the bat
- Patented airflow design and wicking materials create amazing cooling and helps wick sweat away
- Superior Palm-to-Grip contact reduces forearm and hand muscle fatigue during batting
- The loose-fitting neoprene wrist strap allows natural flexibility and ventilation • You can choose a 'tighter fit' for the **aero BHP** by closing the wrist strap over the sweatband
- The sweatband is not attached to the **BHP** so it can be washed and replaced at any time

## BETTER DURABILITY

- Amara leather** is not affected by salty sweat.
- Amara leather** and silicon palm surfaces for the **P1** will outlast old style gloves when used with the specially developed **aero BatGrip**.
- aero BHPs** come with a **12 month** limited warranty **BUT ONLY WHEN USED WITH the aero BatGrip**. Warranty is void if used with any other grip.
- aero BHPs** are washable by hand in warm water.
- DO NOT DRY IN DIRECT SUNLIGHT.**

## BETTER BALL CONTROL

Sticky friction between the **Amara**/silicon combination and the **aero BatGrip** and the snug fitting palm, reduces the bat twisting if you don't 'middle' the ball.

**You get better performance by...**

- Increased control of shot direction. *You'll find the gaps in the field more consistently*
- Increased ball distance and striking power through improved bat-to-ball energy transfer. *You'll hit or clear the boundary more often*
- Narrower profile and 3D moulded design reduces chances of being hit on the gloves and dismissed
- aero BHP** sizing caters for all hand proportions, particularly **P1** with **N** (narrow size) for those who prefer a super snug fit or for slimmer hands...**especially youth and women players**
